

LONG-TERM PLANNING & IMPLEMENTATION OF SMART DISTRIBUTION GRIDS

WORKSHOP

Highlighting developments in Asia and Pacific region

	12 September 2024
	09:00-11:00 CEST
	Online (Link)

WORKSHOP OBJECTIVES

During the workshop we will explore the preconditions, challenges, and opportunities based on the perspectives from key actors, who will provide examples from different countries in Asia and Pacific region.

- Engage in discussion and collaboration to address the topics related to strategic planning and distribution grids
- What are the fundamental prerequisites for grid development across diverse geographies?
- How do uncertainties impact the capacity of grid actors to effectively plan and implement distribution grids?
- How can actors with complementary roles and responsibilities work together to accelerate distribution grid transformation?

 **Speaker presentations**

 **Q&A session**

 **Interactive session**
